

What to expect: Your project from start to finish

1. You'll start by meeting with an All Craft Exteriors project estimator. Typically, we meet with you at your home or office. We'll take measurements and photos. You'll have a chance to ask us questions. Next, we'll talk about your budget range and product options.

2. Your project estimator consults with our installation experts about your project. An estimate is submitted for your approval. If you accept the estimate, then we sign an agreement, collect a 50% deposit, and schedule your job and assign a crew.

3. You'll get a call from the production office. We'll set an appointment to begin the work. There are many factors that affect this. In addition to your schedule and ours, delays can, and often do, happen due to the weather. (This is Minnesota, after all!)

PLEASE REMEMBER: Before your job begins you will need to remove anything delicate (pictures, clocks, mirrors, shelving, dishes, etc.) from walls and store it safely away from external walls and work areas!

4. The All Craft Crew arrives to begin your installation. They'll check in with you, treat your property with the utmost respect, and leave the jobsite cleaner than they found it. Depending on your project, this can take a few hours, or several days.

5. YOUR PROJECT IS COMPLETE! Your project estimator will contact you and make sure you are completely satisfied. At this time any remaining balance will be due.

6. How'd we do? Please let us know by leaving us a review on Google, Facebook, or the Better Business Bureau's website.
